

Behringer WING Edit Update

Version 3.3 (27 November 2025)

Added

- X-Touch support for two devices via MCU MIDI (e.g. X-Touch + X-Touch Extender). X-Touch firmware 1.24 required
- Reset EQ bands by holding down the button
- Effect reset button in insert slot (without changing the effect model)
- New compressor plugins: Even 88-COMP, LMT Compressor, One Knob Compressor
- New dual-band dynamic EQ plugin available in the Gate and Compressor slot
- Expanded noise gate and compressor selection available on Aux channel
- Direct inputs to Phones and Speakers monitoring buses
- Enable/disable GATE, COMP, EQ and INS slots in the Mixview screen with right click or command + click

Changed

- DCA assignment overview directly above the channel fader
- All dynamic processors are available in both the Gate and Compressor slots
- Master fader can be assigned to all channels
- INIT/COPY toolbox includes Bus to Bus and Bus/Main to Matrix feeds
- Multiple Sources can be selected on the SOURCES screen by click and drag. Parameter changes are applied to all selected Sources
- Preamp gain and phantom power accessible on the User Patches screen
- Six additional channel colors
- Model name for WING/WING BK renamed to “wing-fullsize”
- Bus Feed Configuration screen allows copying channel fader levels to sends levels
- Send panning options: link to channel OFF, ON and REV

Fixed

- Library lock icon position for read-only list entries
- PSE/LA COMBO active LED
- 76 LIMITER AMP "ALL" parameter
- Library RENAME button visibility
- Empty SD cards formatting

- "RTA in use! Check mixer settings" message after syncing PC > Mixer
- SETUP > AUDIO > GLOBAL INPUT SELECT OVERRIDE in offline mode
- EQ band button hold to reset on BUSES and MAIN/MTX
- EQ band solo
- Source parameters reset by activating SRC SOLO
